CHOOSE THE ELECTRICITY PRICE PLAN THAT WORKS BEST FOR YOU

Time-of-Use (TOU) Rates

TOU pricing charges customers according to the day of the week and time of day that they use electricity. This price plan may benefit customers who shift high electricity-usage activities, such as doing laundry or running the dishwasher, to off-peak periods, which are charged at a lower rate.

Ultra-Low Overnight (ULO) Rates

ULO offers customers rates based on ultra-low overnight, mid-peak, on-peak and weekend off-peak pricing. This may benefit customers who shift high electricity-usage activities, such as charging electric vehicles, doing laundry or running the dishwasher, to lower-demand periods overnight. ULO price periods are the same in the summer as they are in the winter.

Tiered Rates

Tiered pricing separates electricity consumption into two price tiers. Customers are charged one rate for electricity usage up to a certain amount of consumption (or threshold) per month, and a higher rate for electricity used above that amount. This price plan may benefit customers who prefer to have the flexibility to use electricity at any time of day.

For more information on how to choose your preferred price plan, as well as factors to consider and tools that can help you decide, please visit torontohydro.com/customerchoice

PROGRAMS TO HELP YOU SAVE AT HOME

LEARN MORE ABOUT HOW YOUR ELECTRICITY DOLLARS ARE SPENT AT TORONTOHYDRO.COM/INVESTMENTPLAN

EXPLANATION OF ELECTRICITY TERMS ON YOUR BILL. For a detailed explanation of electricity terms, please visit oeb.ca

Electricity — This is the cost of the electricity supplied to you during this billing period and is the part of the bill that is subject to competition.

Delivery — These are the costs of delivering electricity from generating stations across the province to Toronto Hydro, then to your home or business. This includes the costs to build and maintain the transmission and distribution lines, towers and poles, and operate provincial and local electricity systems.

A portion of these charges is fixed and does not change from month to month. The rest are variable and increase

or decrease depending on the amount of electricity that you use.

The Delivery Charge also includes costs relating to electricity lost through distributing electricity to your home or business.* Toronto Hydro collects this money and pays this amount directly to our suppliers.

*When electricity is delivered over a powerline, it is normal for a small amount of power to be consumed or lost as heat. Equipment, such as wires and transformers, consumes power before it gets to your home or business.

Regulatory Charges — Regulatory charges are the costs of administering the wholesale electricity system and maintaining the reliability of the provincial grid.

Global Adjustment — Electricity generators in Ontario receive a combination of payments from the operation of the wholesale market, payments set by regulation, and payments under contracts. Your portion of the net adjustments arising from these and other authorized payments is included on your bill as the Global Adjustment.

OUR COMMITMENT TO ACCESSIBILITY

Toronto Hydro is committed to providing quality service that's accessible to everyone. It's our goal to eliminate any barriers that may exist by ensuring that all customers, employees and members of the public receive the same information and quality of service.
